

9.3 Declaration of harmlessness

This declaration of harmlessness of the operator is used to ensure work safety and the protection of our employees, the transport company and the environment from harmful effects when handling dangerous materials as well as to protect you from claims for compensation.

Every commercial company is obligated to comply with the legal regulations on work safety, set forth for example in Germany in the Workplace Ordinance (ArbStättV), the Accident Prevention Regulations (UVV), the Hazardous Substances Ordinance (GefStoffV) and the applicable environmental regulations.

When returning pumps and their accessories, please send them back to us in a properly cleaned condition (safe and harmless for health and environment) and confirm the safety and harmlessness of the medium used.

If used with toxic, microbiological, explosive, radioactive or other hazardous substances, the safety data sheet must be provided to us and enclosed to the shipment.

Failure to follow the above instructions will lead to the implementation of measures that ensure the safe handling of the pump or the device, at your cost. We reserve the right to reject contaminated pumps and accessories and to return them for cleaning at your cost!

This declaration of harmlessness must be attached clearly visible outside of the packaging of the return shipment, and if possible sent in advance by e-mail including the safety data sheet, if applicable, to: service-emea-gr@circor.com. Please understand that return shipments without a declaration of harmlessness cannot be processed until such declaration is received.

Pump type

Serial number:

Was the pump operated with hazardous substances or other media that are hazardous to health or the environment?

- ☐ No
☐ Yes

Medium used:

UN / CAS number (see safety data sheet):

☐ The pump has been thoroughly drained and cleaned outside and inside prior to dispatch or provision.

☐ Special safety precautions are not necessary.

☐ Special safety precautions regarding residual liquid, rinsing media, personal protective equipment and disposal are necessary (safety data sheets are required and must be sent in advance/enclosed).
